FFO is computed in accordance with the definition adopted by the Board of Governors of the National Association of Real Estate Investment Trusts ("NAREIT"). NAREIT defines FFO as GAAP net income or loss adjusted to exclude net gain from sales of depreciated real estate assets, real estate impairment losses, depreciation and amortization expense from real estate assets, extraordinary items and other specified non-cash items, including the pro rata share of such adjustments of unconsolidated subsidiaries. FFO and FFO per diluted share are used by management, investors and analysts to facilitate meaningful comparisons of operating performance between periods and among our peers because it excludes the effect of real estate depreciation and amortization and net gains on sales, which are based on historical costs and implicitly assume that the value of real estate diminishes predictably over time, rather than fluctuating based on existing market conditions. FFO does not represent cash generated from operating activities and is not necessarily indicative of cash available to fund cash requirements and should not be considered as an alternative to net income as a performance measure or cash flows as a liquidity measure. FFO may not be comparable to similarly titled measures employed by other companies. A reconciliation of our net income to FFO is provided above. In addition to FFO, we also disclose FFO before certain items that affect comparability. Although this non-GAAP measure clearly differs from NAREIT's definition of FFO, we believe it provides a meaningful presentation of operating performance. A reconciliation of FFO to FFO as adjusted for comparability is provided on page 1 and page 2 of this press release.

(1) FFO is computed in accordance with the definition adopted by the Board of Governors of the National Association of Real Estate Investment Trusts ("NAREIT"). NAREIT defines FFO as GAAP net income or loss adjusted to exclude net gain from sales of depreciated real estate assets, real estate impairment losses, depreciation and amortization expense from real estate assets, extraordinary items and other specified non-cash items, including the pro rata share of such adjustments of unconsolidated subsidiaries. FFO and FFO per diluted share are used by management, investors and analysts to facilitate meaningful comparisons of operating performance between periods and among our peers because it excludes the effect of real estate depreciation and amortization and net gains on sales, which are based on historical costs and implicitly assume that the value of real estate diminishes predictably over time, rather than fluctuating based on existing market conditions. FFO does not represent cash generated from operating activities and is not necessarily indicative of cash available to fund cash requirements and should not be considered as an alternative to net income as a performance measure or cash flows as a liquidity measure. FFO may not be comparable to similarly titled measures employed by other companies. - 6 -

(1) FAD is defined as FFO less (i) recurring tenant improvements, leasing commissions and capital expenditures, (ii) straight-line rents and amortization of acquired below-market leases, net, and (iii) other non-cash income, plus (iv) other non-cash charges. FAD is a non-GAAP financial measure that is not intended to represent cash flow and is not indicative of cash flow provided by operating activities as determined in accordance with GAAP. FAD is presented solely as a supplemental disclosure that management believes provides useful information regarding the Company's ability to fund its dividends.

(2) FAD payout ratios on a quarterly basis are not necessarily indicative of amounts for the full year due to fluctuation in timing of cash based expenditures, the commencement of new leases and the seasonality of our operations.

(3) Includes expenditures of \$25,541, \$12,466, and \$14,197 in the three months ended December 31, 2013 and 2012 and September 30, 2013, respectively, and \$61,895 and \$24,354 in the year ended December 31, 2013 and 2012, respectively, for the 608,000 square foot Motorola Mobility lease at the Merchandise Mart (whose cash rent has not commenced).

(1) EBITDA represents "Earnings Before Interest, Taxes, Depreciation and Amortization." Management considers EBITDA a supplemental measure for making decisions and assessing the unlevered performance of its segments as it relates to the total return on assets as opposed to the levered return on equity. As properties are bought and sold based on a multiple of EBITDA, management utilizes this measure to make investment decisions as well as to compare the performance of its assets to that of its peers. EBITDA should not be considered a substitute for net income. EBITDA may not be comparable to similarly titled measures employed by other companies.

EBITDA BY SEGMENT (unaudited and in thousands)

As a result of certain organizational changes and asset sales in 2012, the Merchandise Mart segment no longer met the criteria to be a separate reportable segment; accordingly, effective January 1, 2013, the remaining assets were reclassified to "Other." We have also reclassified the prior period segment financial results to conform to the current year presentation.
